

Online Home Learning

In the event of a bubble being closed we will be providing you with your child's work for them to access online.

Padlets

As we did in the previous lockdown, we will be using daily Padlets to form a timetable of work for your child's class. There will be some ideas on here and in addition, there maybe some links to videos and websites. We may also load some presentations or worksheets into these Padlets. We will send the Padlet link by email to you and give you a password to access your child's class Padlet.

Discovery Education Experience

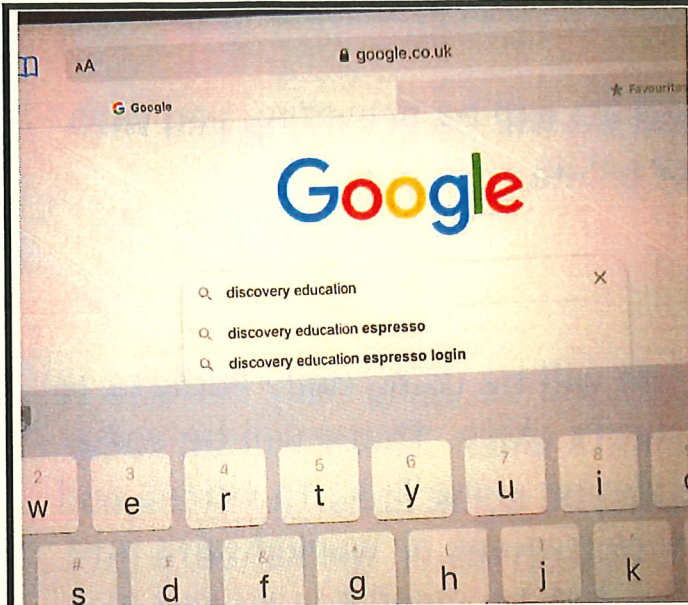

In addition to the Padlets, we have also created your child a user name and password for the platform Discovery Education Experience. Here we are able to tailor work to your child's individual needs by providing them with tasks that are specifically for them rather than the class or group.

Teachers will be setting work using the platform. They will be able to monitor the completion of tasks and also see how children have performed in activities, enabling them to adapt and change tasks for the children.

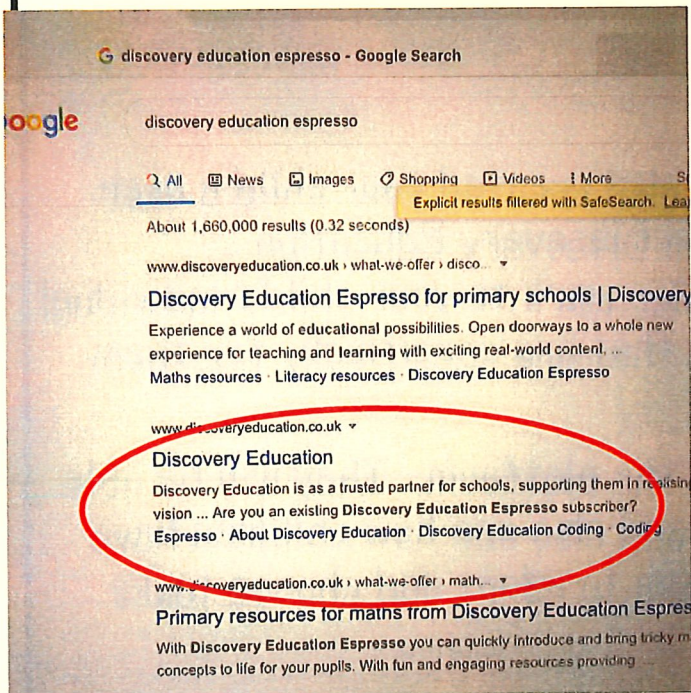

Your child's teacher will email you the user name and pass word for your child. Below are instructions for logging on and setting up your child at home. It can be accessed on any device.

1. Go to google on your internet browser

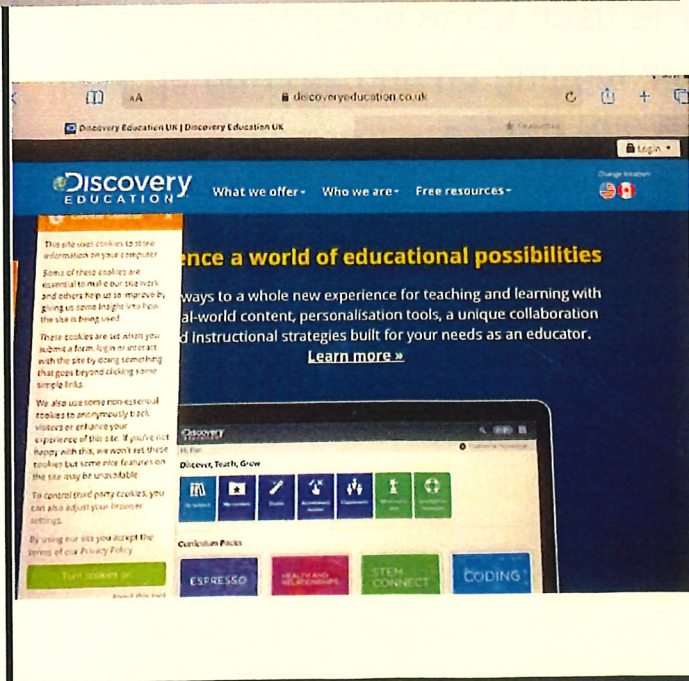

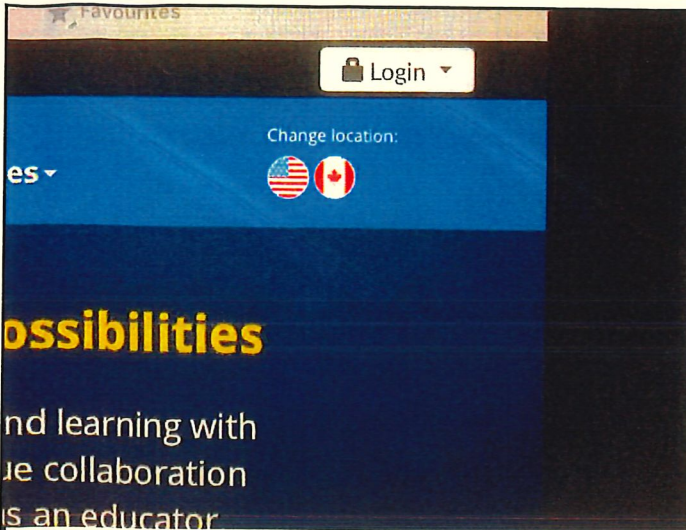

2. Type in Discovery Education
(on iPads only this can be downloaded as an app- however on android devices it is not available as an app)

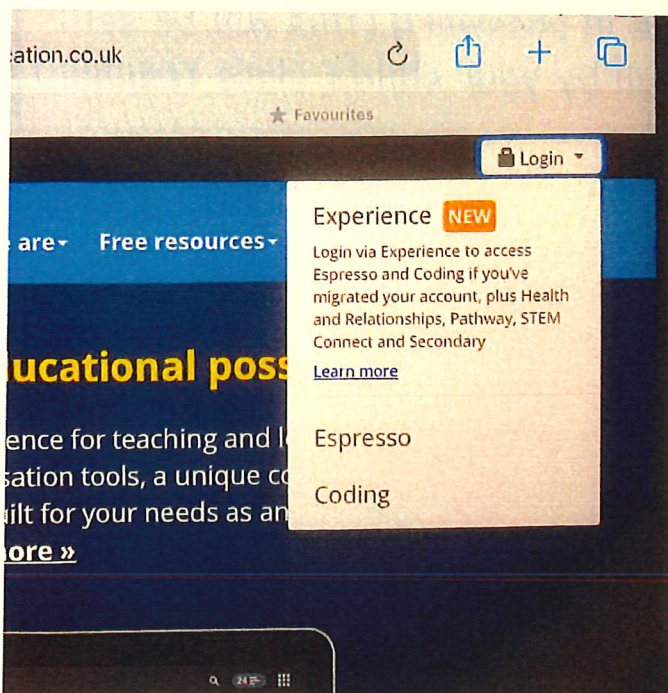

3. Select Discovery Education

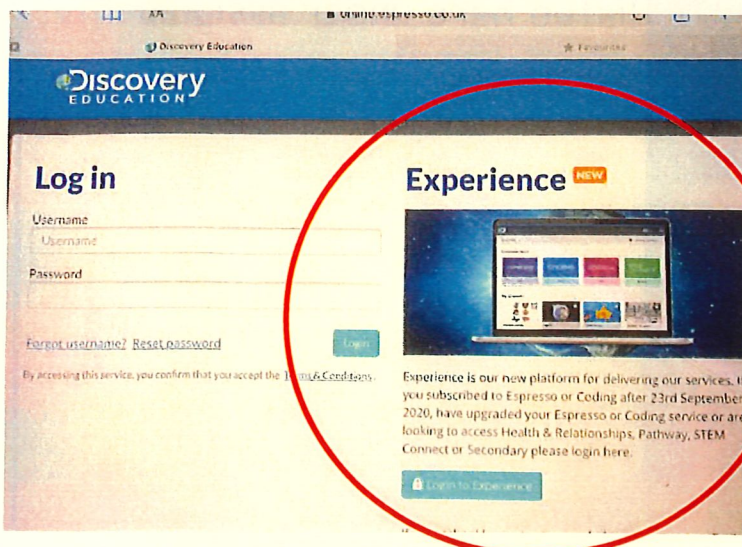

4. It will take you to this website

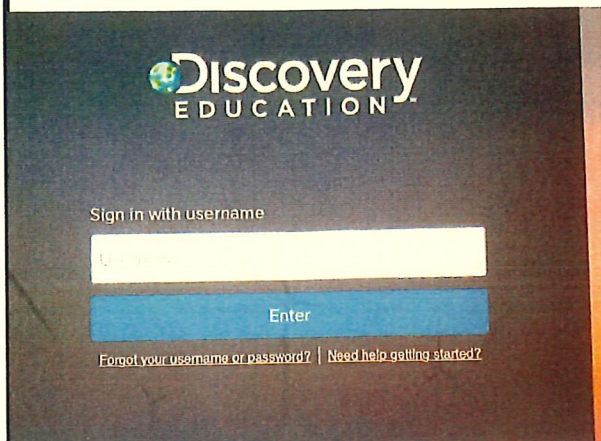

5. There will be a login button on the top right corner

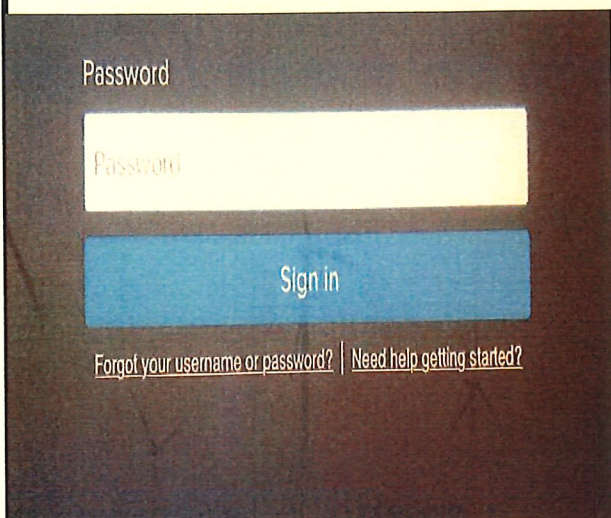

6. On the drop down menu click any of the selections

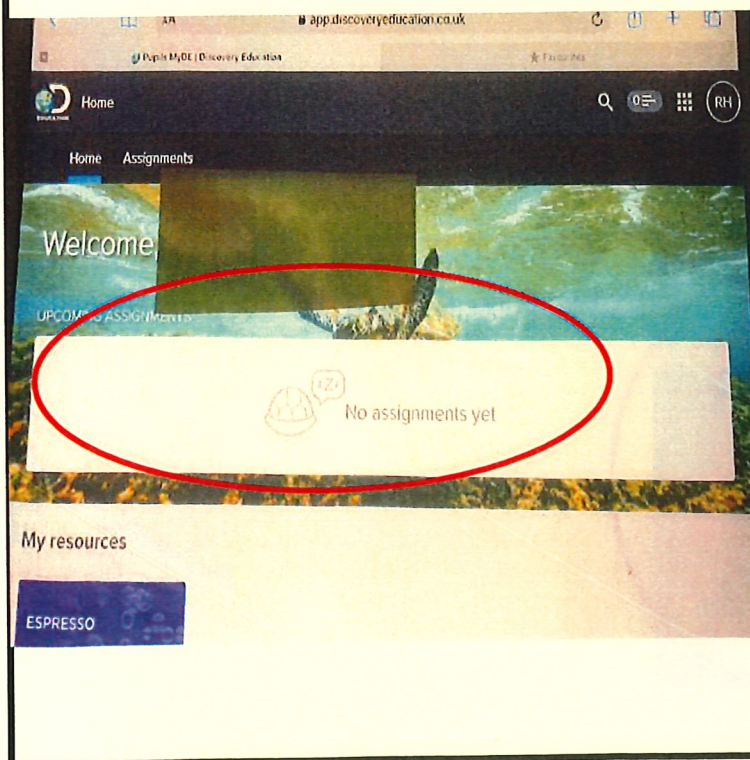

7. Once arriving at this page, select to log on to Experience

8. Type in User name (this will be sent by email by your child's class teacher)

9. Type in password (this will be sent by email by your child's class teacher)

10. Your child's welcome page will look like this- activities or tasks to be completed will be listed here under assignments.

Please remember we are here to help you. Do contact us via your class email with any questions or queries you have regarding the online learning package, we will do our best to support you.

The children are practising working with both Padlets and Discovery Education Experience in school to ensure that where possible they understand how to use it, however they will need the support to log on at home and use the systems too. Over the coming weeks we will be setting homework tasks to help your child to become familiar with working in this way, so that, in the event of a bubble closure, children do not feel worried or apprehensive around using it.

Thank you for your continued support.
