

Badgers Class Weekly Blog

Week Commencing: 26th September 2022

Day	What we have done today
Monday	Today, our last group of pupils enjoyed going onto the Beatrice narrowboat - we have all loved this enrichment activity! In school, we practised letter and number formation and enjoyed PE, where we made obstacle courses for our peers. We loved the competition of being timed to get around the course.
Tuesday	In English this morning, we explored verbs (doing words). We started with lots of actions and then worked through part of Stig of the Dump to find other verbs. In maths, we began to further our knowledge of more and less by working on 1, 10 and 100 more. In the afternoon we worked on our understanding of Hindu gods. We used forest school to create Hindu gods using sticks and leaves.
Wednesday	Following on with our expressive language in English, we worked on similes. Similes are where we compare two things with 'like' or 'as'. We started by watching clips from Disney and identifying when they compared two things in their songs. We LOVED this activity. In maths, we continued to work on more and less and introduced 1, 10 and 100 less. The afternoon saw us continue working on adaptation. How have animals and plants adapted to their environments. We became scientific researchers and researched our own chosen animal.
Thursday	I am proud of all of our swimmers! Everyone is working so hard and is displaying a great understanding of the swimming pool rules. In the afternoon, we explored Stone Age artifacts and recreated our own using clay.
Friday	A morning focused on our weekly spelling challenge and showing off our weekly homework (to create our own cave diorama). Afternoon break we worked with construction and team work. In the afternoon, we enjoyed choice time and going to spend (or save) our Springfield Pounds).
