How to use this Padlet

Each day, your daily activities will be sent out on here as a timetable, including a brief description of that activity for that subject.

For the majority, you will then be directed to your Discovery Education page to find videos, notes and the set activity for you to complete at your Badgers differentiated level.

Please click on the attachment below to access your Discovery Education page.

Remember to click 'mark as complete' when you have finished. This allows me to see that you have been able to access each piece of work that has been set.

Does your school/district access Discovery Education from a custom URL? Enter your district's custom URL to sign in using Single Sign On (SSO).

DISCOVERYEDUCATION

Attached is a provisional daily schedule for you to follow to offer some routine and predictability during the day. Our Badgers class members really thrive on the predictability during the day.

Please use this as you feel able. You may wish to use it as a daily 'tick list' to tick off daily tasks or to use it as a timetable for rigidity. Either way, I hope that it offers a flow throughout the day.

Daily timetable

I am attaching a daily timetable that you may or may not want to follow. This is at your discretion. It may help to support your throughout the day.

Mental maths

I am going to start each week by attaching a mental maths activity to your Discovery Education page - you will find this under '11.1.21'.

Mental maths is taught to develop basic arithmetic rules at speed without, in time, using a pencil or paper.

- Improves self confidence
- Helps with the application skills in maths
- Helps to reduce mistakes and anxiety in problem solving
- Stimulate our interest in maths
- Develops memory skills and concentration

Please see my video below talking you through today's mental maths activity.

Science - Plants

What do plants need to grow.

Please follow the video below where I am trying to give my very best Alan Titchmarsh presentation.

If you are able, at some point during the week, maybe you could

have a go at planting some of your own seeds? This would have been our activity in school. Once you have watched the video, you will find a task set for you on Discovery Education.

Science - What plants need to grow
Created using Microsoft Sway

SWAY

Parts of a Plant

FLOWERS
Attract pollinators and make seeds that will sprout when the time comes.

LEAVES
Green leaves use sunlight and water to make food for the plant.

STEM
Supports the plant and carries water and nutrients to the leaves.

SEEDS
The part of the flower that holds the seed in order to grow. After pollination, the petals fall away and the seed develops into a fruit.

ROOTS
The part of the plant that holds the plant steady in the ground, so it can grow and absorb water and nutrients from the soil and make more food for the future.

Reading - Bug Club

We have been able to set up our reading books online. I have allocated books to each of your profiles. This is a fantastic resource where you read the exact books that you would read in school, set at your phonics level, but on the computer/tablet screen.

If you find that you have books without words, then this is an opportunity for you to explore the pages of the books by finding different items (for example, where is the red balloon and then verbalise these nouns, adjectives and verbs - I can see the girl running...).

Once these books are completed, the website will/should automatically progress through to another book or you can

choose one?

I will send you your username via an email but below is the password and school code.

Password - Badgers

School code - cjaw

ActiveLearn: Login

A digital learning space for your pupils and a toolkit for you, so that you can search, plan, allocate and assess all in one place.

ACTIVELEARNPRIMARY

Discovery Education

If your Badgers member isn't keen on accessing work then suggesting that you are going to watch the Daily News may be a 'way in'. We all enjoy watching the Daily News each morning. You can find this by typing it into the search bar, once you have accessed your page.

Phonics

Please find your weekly phonics attached in your Discovery Education page. This will be a video to watch, based on this week's sound, followed by an activity to complete, such as blending or segmenting words.
